Percentage of Positive Question Responses

The following tables show the percentage of positive responses to each question. The denominator used to calculate each percentage for each question is the total number of question responses received from students for that question. Note that due to some questions having inverted polarity/"negative wording", a higher percentage is not necessarily better, however green color is better and red color is worse.

Note: Starting this year, percentage positive calculations have been adjusted for accuracy to reflect those who skip individual survey questions. This change slightly increases the values shown and percentages may not match published results for previous years.
